Reason of Allowance

1. Applicant's response to the last Office Action, filed July 9th, 2007 has been entered and made of record.

2. The following is an examiner's statement of reasons for allowance:

Independent claim 1 is allowable over the prior art of record.

Claims 2-7, and 9-17 depend from claim 1, therefore, are allowed.

Independent claim 1 recite the limitation of: "determining said respective nodule region of each nodule candidate based on respective differences between the at least one first morphological image feature and the at least one second morphological image features". The combination of these features as cited in the claims in the combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

The closest reference of US 5,666,434 to Nishikawa et al. discloses a computer-aided method for image feature analysis and diagnosis in mammography. However this reference either by itself or by combination with other references does not teach the limitation that the determining of respective nodule region of each nodule candidate is based on respective difference between the first morphological image feature and the second morphological image feature

3. In view of the amended claims and the Applicant's Arguments, the rejection to claims 1-7, and 9-17 are expressly withdrawn.
